

New From **M**obile Cables System®

Introducing cable connectors that make the MCS visual display system even more exceptional and easily adaptable than ever before!

The new MCS® connectors feature a ball-bearing system allowing you to adjust your visual display by simply sliding the connectors up or down the cable. There are no set screws, making adjustments or revisions to your display completely hassle-free. Available in Satin Chrome Finish, the connectors are compatible with the full line of Mobile Cables System® cable assemblies.

MCS® Adjustable Support for Drilled Shelf:

Part# 051700, Available in Satin Chrome Finish.

Overall Neck Diameter = 10mm.
Overall Length = 39mm.
Base Diameter = 16mm Requires 7/16" hole
Max. load = 25 lbs.

MCS® Adjustable Horizontal Shelf Connector for Acrylic or Metal Panels up to 1/4" thick:

Part# 051702, Available in Satin Chrome Finish.

Diameter = 12mm.
Overall Length = 26mm.
Overall Vertical Length = 23mm
Jaw Depth = 6mm
Max. load = 15 lbs

MCS® Adjustable Vertical Panel Connector for Acrylic or Metal Panels up to 1/4" thick:

Part# 051701, Available in Satin Chrome Finish.

Diameter = 12mm.
Overall Length = 26mm.
Overall Vertical Length = 23mm
Jaw Depth = 6mm
Max. load = 15 lbs

Mobile Cables System®, the world leader in fine cable and rod suspension systems, suspends your ideas with clarity and transparency. Because of its broad selection of components, it is versatile enough to accommodate your toughest design challenge.

Our system, based on tensioned cables and rods, is manufactured from the highest quality materials: 1.5mm cables are composed of 7 x 7 construction galvanized steel rope while 6mm rods are fabricated from stainless steel or brass. Components are machined from solid brass and are available in several finishes. The result is a product line with exceptional fit and finish with greater resistance to wear and fatigue. Our systems are rugged enough to be used in the toughest retail settings and last in excess of 10 years.

Displays are engineered to be installed quickly and easily and permit rapid alteration of graphics and products. You can easily adjust, modify, add, and reuse components to accommodate your evolving display needs.
